

## East Lancashire Hospitals NHS Trust (ELHT) Wound Care Formulary 2023

### Version: 1.4

The Wound Care Formulary was compiled by the Tissue Viability Nurses within the 5 Trusts in the Integrated Care Board (ICB).

The aim of this Wound care Formulary is:

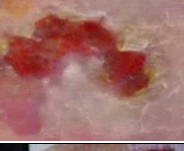

- To provide practitioners with guidance and a selection of products which are for preferred use in the ELHT footprint, based on effectiveness, suitability, acceptability, and cost-effectiveness.
- Practitioners should aim to use a product included in the formulary in all cases and only use a non-formulary product when there is a good clinical reason for doing so.

As a health professional using a formulary you must:

- Use your professional skills, knowledge, and judgement to make a decision and justify the decisions you make.
- Ensure the advice you give is evidence based.
- Have the knowledge and skills for safe and effective practice.
- Recognise and work within the limits of your competence.
- Keep knowledge and skills up to date.
- Take part in learning/practice activities.
- Keep a clear record and accurate record of all the discussions you have, assessments you make, the treatment you provide and the effectiveness of the treatment.
- Ensure everyone is aware of the dressing regime.

<b>Contents</b>	<b>Page Number</b>
Wound bed Type	3
First line dressings	4
Second line dressings	11
Specialist only dressings	13
Compression bandages	15
MASD products	16
Topical negative pressure products	17
Wound manager bags	19
Dressing request and exemption form	21

**East Lancashire Hospitals NHS Trust**

Wound Bed	Example	Depth	Aim	Choice	
				Low - mod exudate	Mod - High exudate
Post op wound or sutures / strips		Superficial	Protect	Simple post op island dressing	Consider cause - ? refer
Pink (Epithelialising)		Superficial	Protect	Wound contact layer or Hydrocolloid or Island dressing	Foam Dressing / Wound Contact + Absorbent pad
Red (Granulating)		Superficial	Absorb / Protect	Foam or Wound Contact layer + Absorbent Pad	Wound Contact layer + Absorbent Pad
Red (Granulating)		Deep / Cavity	Absorb / Protect	Alginate / gelling fibre as filler + Foam or Absorbent Pad	Alginate / gelling fibre as filler + Foam or Absorbent Pad
Yellow (Sloughy)		Superficial	Remove slough	Honey + Foam or Absorbent Pad	Alginate / gelling fibre + Foam or Absorbent Pad
Yellow (Sloughy)		Deep / Cavity	Remove slough	Alginate / honey as filler + Foam or Absorbent Pad	Alginate / gelling fibre as filler + Foam or Absorbent Pad
Black (Necrotic / Eschar)		<b>Caution –not suitable to debride. Never debride black stable eschar from lower limb without seeking specialist advice.</b> In heel / foot pressure ulcers, this may serve as the body's natural protection and should not be removed. Consider use of Inadine strips around the wound edge to protect healthy skin from non-viable tissue			
		If appropriate wound for debridement consider speed of debridement (to reduce risk of infection). Conservative sharp (by trained Podiatrist / TVN; Autolytic (hydrogel / hydrocolloid) or Larvae (via TVN)			
Clinically Infected		Superficial or deep	Reduce bacteria in wound	Wound swab + Oral antibiotics + antimicrobial dressing. Review sensitivities and prescribe/change antibiotic accordingly. Change to alternative antimicrobial if no improvement. Ensure observations for sepsis are in place	

Line	Type	Brand	Indications	Size	code	Quantity
<b>First Line (Hospital &amp; Community)</b>	Alginate (Advanced Medical Solutions)	Activheal Alginate	<i>Use as a filler in medium to high exuding wounds to absorb exudate</i>	5x5cm	ELS139	10
				10x10cm	ELS140	10
				10x20	ELS141	10
	Adhesive Foam-Non-Silicone (3M)	Tegaderm Foam Adhesive	<i>Use of a silicone will reduce absorbency. This product should be reserved for those patients with fragile skin/those who experience pain on removal of adhesive dressings</i>	10x11cm	ELA177	10
				14x15cm	ELA178	10
				19x22.2cm	ELA179	10
				14x14cm Heel	ELA180	10
				6.9x7.6cm	ELA492	10
				6.9x6.9cm	ELA493	10
	Foam Silicone Adhesive (H&R Healthcare) (Coloplast)	Kliniderm Foam Border	<i>Use of a silicone will reduce absorbency. This product should be reserved for those patients with fragile skin/those who experience pain on removal of adhesive dressings</i>	15x20cm	ELA746	10
12.5x12.5CM				ELA1344	10	
7.5x7.5cm				ELA1187	10	
10x10cm				ELA1195	10	
15x15cm				ELA1194	10	
Biatain Silicone Foam Adhesive		7.5cmx7.5cm		ELA425	10	
		10cmx10cm		ELA451	10	
		10cmx20cm		ELA1011	5	
		12.5x12.5cm		ELA426	10	
		15cmx19cm Sacral		ELA1014	5	
Tracheostomy Dressing (3M)	Tegaderm Foam Tracheostomy Dressing	<i>This foam is best suited to fit around the Tracheostomy site</i>	8.8x8.8cm fenestrated	ELA169	10	

	Non-Adhesive Foam (Smith & Nephew)	Allevyn Non-Adhesive Foam	<i>Foams are best suited to wounds with a medium level of exudate.</i>	5x5cm 10x10cm 20x20cm 10.5x13.5 (heel)	ELA129 ELA131 ELA133 ELA100	10 10 10 10
