

Management of Moisture Lesions and Incontinence Associated Dermatitis (IAD)

Please manage the reason for any incontinence & ensure appropriate advice obtained / referrals made / products used. See continence & Catheter Care Formulary

	<p>Healthy skin</p> <p>Maintain integrity Keep skin clean and dry</p>	<p>Un-perfumed soap and water to cleanse ensuring soap residue is rinsed off. Dry skin should be moisturised to reduce risk of breakdown.</p>
	<p>Mild excoriation IAD</p> <p><u>No broken areas.</u> Erythema (Redness) only</p>	<p>Consider soap substitute to cleanse (this must be rinsed off. Towel dry)</p> <p><i>Use durable barrier cream:-</i> Medi Derma-S Cream</p>
	<p>Moderate excoriation IAD</p> <p>Erythema with less than 50% broken skin</p>	<p>Use soap substitute to cleanse (this must be rinsed off. Towel dry)</p> <p><i>Use barrier film</i> Medi Derma-S barrier film</p>
	<p>Severe excoriation IAD</p> <p>More than 50% broken skin Oozing and / or bleeding</p>	<p><i>Use barrier treatment</i> Medi Derma-Pro Cleanser and Ointment</p>
	<p>Peri-wound maceration / excoriation.</p>	<p>Consider more absorbent dressing or changing dressings more frequently</p> <p><i>Use barrier film / spray:-</i> Medi Derma-S barrier film</p>
	<p>Sweat rash in skin folds</p>	<p>Use Soap substitute to cleanse</p> <p><i>Use barrier cream</i> Medihoney Cream</p>
	<p>Any skin level of skin damage caused by uncontrolled diarrhoea including erythema</p>	<p><i>Use barrier treatment</i> Medi Derma-Pro Cleanser and Ointment</p>

Medi Derma products are first line

If problem persists and due to incontinence: Ensure continence assessment has been carried out and refer to Bladder and Bowel Specialist.
